Tumbled Finish

Cobblestone refers to the smooth, round shape of the stones that workers picked up in rivers and streams. They generally range between 2 and 10 inches in size.

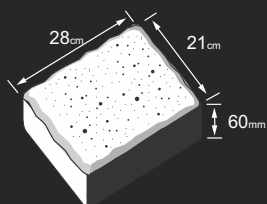

Cobblestone is a natural building material based on cobble-sized stones, and is used for pavement roads, streets, and buildings. Granite cobblestone pavers do not break easily.

They are mostly used as decorative materials for elevation walls, garden etc.,

CUSTOMIZED SIZES, HAND CUT, MACHINE CUT & TUMBLED FINISH AVAILABLE

USES OF GRANITE COBBLESTONES

MARS MINERALS
TRADING AGENCY

DRIVEWAYS : Granite cobblestones are an ideal paving material for driveways because of their long-lasting quality and textured finish, which provides traction on steep surfaces. They are also commonly used for driveway aprons and driveway edging, as well as edging for planter beds in the center of the driveway.

PLANTER BED EDGING : Granite cobblestones give your landscape a manicured look with those crisp, durable edges, the separation of garden bed and lawn allows you to properly maintain both sections of your yard

WALKWAYS : Granite cobblestones keep grass out and make a crisp lawn edging for walkways, while enhancing the look of your property

PATIOS : Just like with driveways, cobblestones make an ideal material for high-traffic areas such as patios because of their textured finish

HOME EXTERIORS : No other material lends a more classic look to your home exterior than cobblestone. You can add a bit of old world charm with cobblestones around your door or window archway, just like the lake house

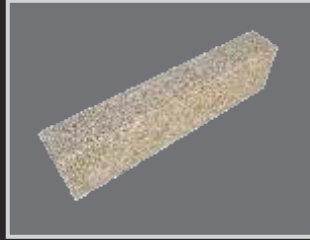

WATER FEATURES : A water feature can add life to your landscape and act as a focal point in your outdoor living space.

Cladding in construction is material applied over another to provide a skin or layer and used to provide a degree of thermal insulation and weather resistance, and to improve the appearance of buildings. Between the cladding and the wall there is a cavity where rain can run down.

USES OF CLADDING STONES

- ▶ Stone Wall cladding can increase the value of property
- ▶ Enhance Appearance of facade with Stone wall Cladding
- ▶ Beautify backyard Patio using natural stone wall cladding
- ▶ Grand property versatility
- ▶ Stone wall cladding insulate property from weather extremities
- ▶ Stone Wall Cladding is easy to maintain
- ▶ Natural Stones for strength & resilient when used in Wall Cladding
- ▶ A plenty of choices for styling & finishing with stone wall cladding

LIMESTONE

Tandur Yellow Limestone

Tandur Blue Limestone

Kota Brown Limestone

Kota Blue Limestone

- ▶ Limestone is one of the most common types of rock found on the surface of the Earth, is a calcareous sedimentary rock composed of the mineral calcite (CaCO_3), which upon calcination yields lime (CaO) for commercial use.
- ▶ Limestone is a beautiful stone and is available in many different colours and shades ranging from white, cream, tones of blues, greys, tans and even dark blacks which occurs when there is a high content of organic material.
- ▶ Limestone has proven its use from simple treads and pavers to landscaping structures and bridges, to soaring cathedrals.

PEBBLES & BOULDERS

Beige Pebbles

Bidasar Brown Pebbles

Bidasar Green Pebbles

Black Pebbles

Chocolate Pebbles

Coloured River Pebbles

Pink Pebbles

Rainbow Pebbles

- ▶ Pebble is a clast of rock with a particle size of 4 to 64 millimeters. Pebbles are generally considered larger than granules (2 to 4 millimeters diameter) and smaller than cobbles (64 to 256 millimeters diameter).
- ▶ Pebbles are often used for landscaping, construction and as decorative elements. Beach pebbles are often used to cover walkways and driveways, around pools, in and around plant containers, on patios and decks.

RIPON SANDSTONE

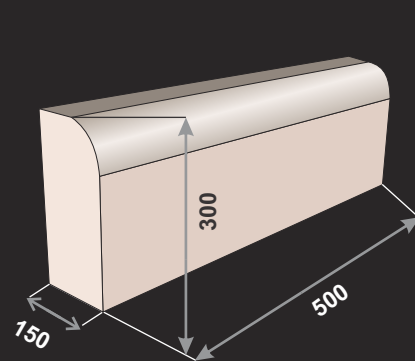

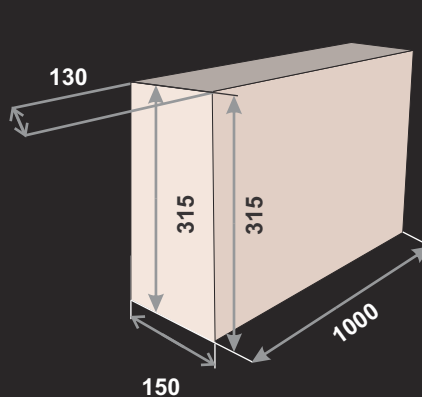

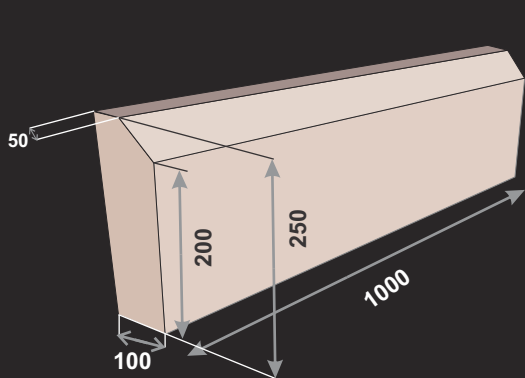

- ▶ Sandstone is a coarse-grained sedimentary rock formed by the consolidation and compaction of sand and held together by a natural cement, such as silica, iron, lime etc. An extremely hard and tough material, it consists of consolidated masses of sand deposited by moving water or by wind & thus having different level of porosity, hardness & compressive strength.
- ▶ The bright and contrasting colours in sandstones are the attributes of iron oxides, manganese oxides and other impurities present in it.
- ▶ Sandstone is suitable for domestic and commercial use. Owing to their natural beauty, sandstones are used for interior as well as exterior decoration including flooring, paving, cladding walls and floors.

Kerb Stones are used for various outdoor requirements in the parks, lawns and other residential locations. Natural stone is very durable for being a natural choice for Kerb Stones. Granite & Sandstone are a popular choice. Kerb stones are used to edge paving, delineate paved areas and provide drainage channels on highways, streets, driveways and other hard landscaping schemes.
